

Engineers Australia Victorian Transport Branch
invites you to attend a free seminar

Victoria @ 9 Million

What will it look like?

Victoria's population is growing at an unprecedented rate. The most recent forecasts predict a population in the year 2050 of 7 million for Melbourne and 9 million for Victoria – significantly higher than assumed in our current planning strategy and transport plan. What does this mean for land use and transport planning in Victoria and Melbourne? Is it more of the same or do we need a fresh approach to successfully transition to this new “Big Australia”? Come along and hear from three high-profile speakers about future directions for Australian cities, and the Commonwealth agenda for transport and land use planning. The speakers will compare Victorian cities with others on an international stage and identify several big ideas we should consider as we approach 2050.

Speakers

Prof Lyndsay Neilson, Founding Director for the Centre for Developing Cities

John Stanley, Institute of Transport and Logistics Studies, Uni of Sydney

Brian Haratsis, Director, Macroplan

*“Victoria's population growth
fastest in nation”*
